

Stevenson core is more than just a class to me. It dives deep into literature that will influence the rest of my life. With all these new perspectives that I learned from reading texts regarding different philosophies, I can promise that my life will never be the same. I noticed drastic improvement in my writing capabilities. My writing was more fluid, well-thought out, concise, and my voice is now heard.

As I continue to pour my heart out into this letter, I would like you to acknowledge that other colleges did not have the opportunities that I had. I matured and developed as a person when I read each and every book assigned to me in class. I annotated them all, too! I look at these other students and their role in society and cannot help but to acknowledge that Stevenson College rocked my world.

I'm not asking you for a trophy, but it would mean so much to me if you--a highly respected decision maker--would allow these upcoming students to grow and develop. If you could place yourself in my shoes when I was a freshman, you would know that I had a lot to learn. It's not an English class that I took for 5 units. It was my opportunity to connect with the people that I lived next to and to put myself in their perspective. To grow and incorporate these philosophies into my everyday life and learn things about myself and the world we all share. I now understand perspectives my parents would not be able to understand, unless they read and discussed the ideas expressed by philosophical authors of outstanding merit in a small, close classroom environment.

I just made it to my car, so I'll be finished soon. Please let these students follow their dreams--the money will come. I know you will make the right choice and not let down our college. STEVENSON COLLEGE is the greatest--always!
P.S. This stream of consciousness writing took me ten minutes. I challenge you to write a more passionate letter than this in ten minutes or less! Thank you for keeping Stevenson Core safe from extinction!
